Work Experience

2024/10 – Pres
Accra

Software Engineer

PaySwitch Com. Ltd 

- Developed a Laravel and Next.js web application that evolved from a visitor management system into the company's primary HRM platform, implementing real-time sign-in monitoring for visitors and employees using WebSockets.
- Served as Principal Web Developer responsible for developing and maintaining the company's main static websites to ensure performance, reliability, and brand consistency.
- Provided Integration Support for clients and developers integrating with the TheTeller Payment API, resolving technical issues related to API usage, transaction flows, and fiscal transfers to client accounts.
- Acted as a key liaison between technical teams and clients to troubleshoot integration challenges and ensure successful payment system deployments.
- Led and mentored interns and National Service (NSS) personnel, delivering hands-on training in web development technologies and best practices. Also supervised learning progress, reviewed code, and supported skill development to improve team productivity and technical competence.

2024/04 – 2024/10
Cape Coast

Front-End Engineer, Contract

Department of Optometry and Vision Science, UCC 

- Developed the user interface for a Patient Information Management System and Electronic Health Record for the department's eye clinic using ReactJS for a Django app.
- Redesigned the Diagnostic Visual Function Research Lab website using NextJS.

2023/09 – 2023/12
Accra, Ghana

Software Engineer, Freelance

Directorate of Information Technology, Ghana Armed Forces HQ

- Developed a web app to take personal and medical records of Cadets at the Ghana Military Academy Infirmary using Laravel, PHP, and Javascript.
- Tutored colleague interns in the basics of web development with HTML, CSS, JavaScript, and PHP.

2022/11 – 2023/01
Accra, Ghana

Software Engineer, Freelance

BlueSPACE Africa 

- Took on the responsibility of gathering comprehensive data on various makes and models of cars to support the creation of an API.
- Searched for FAQs regarding auto insurance for the creation of an auto insurance purchasing WhatsApp bot.
- Tested the functionality of the MTN USSD and a web app for purchasing and renewing insurance policies.

2022/06 – 2022/08
Accra, Ghana

Software Engineer, Freelance

Directorate of Information Technology, Ghana Armed Forces HQ

- Got introduced to Back-end Development with PHP, Laravel, and MySQL by building an inventory web app to take inventory of store stocks.

- Collaborated with two other interns to redesign the Ghana Military Academy website using HTML, CSS, Bulma, JavaScript, and Figma.
- Assisted recruitment officers and supervisors in addressing issues faced by applicants during the military recruitment program.
